GitHub: <https://github.com/rreeves1996>

Portfolio: <https://rreeves.dev/>

Young, effervescent junior full-stack developer who takes pride in his tenacious work ethic and passion for learning. Eager to begin a career in front-end/full-stack development and gain first-hand experience in the industry. Strong background working in team environments with a variety of different cohorts, objectives, and workflows.

Technical Skills

Frontend: HTML & HTML5, CSS, SASS, JavaScript, TypeScript, JQuery, Bootstrap, React.js, Handlebars.js, React Query, Redux

Backend: Node.js, Express.js, MySQL & Sequelize, MongoDB & Mongoose

Other: Next.js, Git, GitHub, RESTful APIs/routes, SQL, Insomnia, MVC, OOP, Figma, Adobe Photoshop

Projects

TeamEZ -

Role: Full-Stack

Deployment: <https://teamez.herokuapp.com/>

Repo: <https://github.com/rreeves1996/team-manager/>

- In my eyes, this has been the biggest milestone so far in my learning! After graduation, I was interested in developing a full-stack React.js app on my own with my own stack (MERN, MySQL). Saying this was a HUGE learning opportunity would be an understatement! I had no option but to learn the ins and outs of every technology I was using, and how to implement them with my stack - and to do this without - unlike boot camp - the help of my peers or teachers. I'm very proud of the lessons I learned and the progress I made developing this app.
- Tools/Languages: HTML, CSS, JavaScript, React.js, Axios, Node.js, Express.js, MySQL, Sequelize, Redux, JWT

To-Do List -

Role: Full-Stack

Deployment: <https://rreeves-todo-list.herokuapp.com/>

Repo: <https://github.com/rreeves1996/todo-list/>

- I hadn't had a chance to try my hand at a to-do list style app since boot camp, so I decided to create my own from scratch using React.js. Allows user to add to-do items for this week, next week, or other to-do items with no date.
- Tools/Languages: HTML, CSS, JavaScript, React.js, Bootstrap

Weather Dashboard -

Role: Full-Stack

Deployment: <https://weather-gsepxpyo4-rreeves1996.vercel.app/>

Repo: <https://github.com/rreeves1996/weather-api>

- Simple weather dashboard using a third-party weather API. Following my boot camp graduation, I decided to try tackling a weather dashboard style app on my own, using my own stack (React.js). I also was interested in creating something that could utilize CSSTransitions, and give me practice building custom UIs.
- Tools/Languages: HTML, CSS, JavaScript, React.js, Node.js

Work Experience

Holliday Masonry - *Mason/Hod Carrier* 7/20 - 2/21, 7/22 - Present

N.W. Cutting-Edge Masonry - *Mason/Hod Carrier* 3/21 - 7/22

Soft Skills: Divergent thinking, working efficiently on a team, working under pressure, learning a nuanced skill/profession, multi-tasking, leadership

Lessons In Your Home - *Piano/Guitar Teacher* 3/21 - 7/22

Soft Skills: Time management, professionalism, communication, mentoring & leadership, effective planning

Pep Boys Kirkland - *Assistant Shop Manager* 12/18 - 2/20

Soft Skills: Time & employee management, professionalism, sales & customer relations, mentoring, working efficiently on a team, working under pressure, multi-tasking, leadership

Performance Motors - *Automotive Technician* 3/17 - 10/18

Soft Skills: Time management, communication, divergent thinking, working under pressure, learning a nuanced skill/profession

Education

University of Washington Boot Camp - *Full-Stack Web Development* Graduated 9/22

Grade: A-

Everett Community College - *Music Composition* Attended 9/21 - 3/22

Average GPA: 3.8

Shoreline Community College - *Automotive Technology* Graduated 9/17

Grade: B+

Everett Community College - *Mechanical Engineering* Attended 9/15 - 6/16

Average GPA: 3.4
